Editorial

... Fertility 2009

Dear Readers,

Wish you very Happy New year! Homoeo Times leaps into the 6th year of publication and celebrates its 5th Anniversary with a work shop and a public awareness program "Fertility 2009".

Homoeo Times strives hard to propogate the efficacy of Homoeopathy to the world. We give importance to the practical aspect rather than the theoretical part. So far we have been receiving articles on theoretical part and clinical part is very poorly represented.

Initially students had shown interest, followed by faculties and now gradually the practitioners from many part of our nation are contributing their case studies. Many of them hesitate to write since the back up datas are poor on a particular case, even though they had achieved excellent results.

We invite all physicians to come forward and unfold their memories like a story are contribute. We do receive letters from many students and young practitioners expecting this aspect of presentation. The seminar Fertility 2009 on practical aspect, which would guide the participants to gain more knowledge on the subject is being hosted as a first step towards this goal.

The New year issue comes to your hands with minor changes in its layout and certain positional changes. The Visual corner has been revised since we received and that the good results of the journal are over powered that it gives an advertisement like look.

We have launched a new topic "Biography" to highlight the banyans of homoeopathy. We have added more case histories in response to our reader's suggestion. We are very happy to share our happiness with you all and thank one and all for giving immense support to us.

With regards

Dr.R. Gnanasambandam
