

is not necessary. This can be used for educative purpose, lectures, seminar clippings and the students activities can be served to share their contributions all over the world.

"www.youtube.com" and others like Google, AOL may allow and accept video files. One can open an account which facilitates to upload a video file. It accepts various formats like AVI, MPEG and other types. The converted FLV files are downloaded easily and

gives you excitement.

A picture is worth a thousand words. In this day and age of digital media, video on the web site can be priceless and definitely benefit our homoeopathic fraternity.

Just log on [www.youtube.com](http://www.youtube.com) and search the files under "Homoeopathy". It fetches many video files and you can learn your self by the features provided by the web developers.

Announcing the most awaited event...  
Another wonderful learning experience from  
Dr. Rajan Sankaran
