1

Diagnose this congenital pigmentary disorder

## Clinical Quiz

2

A fifty five year old chronic alcoholic with history of cirrhosis of liver had vomiting with blood. The gastro endoscopic image taken at cardiac end of the stomach is given for your impression.

## Anamnesis

3

A boy aged seven years old was brought to me with the diagnosis of Seborrheic Dermatitis. The scalp was covered with thick crust and pus is seen in-between here and there discharging foul smelling secretions. Itching < least touch. History of vaccination for all communicable diseases. The boy is plethoric and indifferent to every one.
