

Staphysagria in growths

Dr. S.M. Thakre

A lady aged 43 years consulted me for Metrophagia. She had a cyst in the ovary sizing 20 mm x 38 mm. She was mild, intelligent and very particular, easily exhausted mentally and physically, she never shows her anger out side and Chilly patient. Silica 0/1 was prescribed. Menses become normal. But USG shows the increase in size of cyst. i.e. 30 mm x 49 mm. Considering the mild nature with suppression of anger and pathological symptom i.e. cyst, Staphysagria 0/1 was prescribed for 15 days and it was continued for next 3 months upto Staphysagria 0/9. When Metrophagia appears again USG was done and in this report ovary shows no cyst. In the cystic growth, Staphysagria is the very important remedy.

Lice and Staphysagria

A 5-year-old girl came with the complaints of intolerable itching on head. She was also suffering from indignation and weakness of memory. I advised application of the dilution of one part of staphysagria tincture with four parts of water and prescribed staphysagria 200 BD for 10 days. Lice complaints gone away.

Toothache and warts

Staphysagria is helpful in toothaches. Particularly 200 potency is beneficial in toothache, irritation and bleeding gums. It gives excellent result in local application on the affected part when plantago fails. Staphysagria is also a best remedy for styes and warts.

Styes and Staphysagria

In many of my cases with recurrent styes, staphysagria has helped to cure them as well as to prevent their recurrent nature. In a one month old infant, sleeps all day but awake at night, staphysagria helped a lot to restore the normal pattern of sleep. Staphysagria is of much use in newly married women with burning micturation after coition.
