Female infertility

Dear Readers,

The theme of the issue on "female infertility... in Homoeopathy" has received many submissions. We have received more articles based on theoretical and philosophical findings rather than clinical. Here we have published only few articles which cover the general aspects and are required for a knowledge base. Since the pages are limited we are unable to publish more articles.

The articles on "Female infertility aspects" and "Common clinical findings in female infertility" provide recollection of our knowledge. The prime aspect of infertility is expressed well by Dasani Khyati Narendrakumar. A clinical case on same aspect in which pathological findings were negative has been explained by Dr. Harmeen Bhatia.

The picture presentation by Vekaria Gaurav.M gives glance memory to the remedy. Focus column of this month covers Andhra Pradesh state. A case of Allergic Dermatitis by Dr.A.P.Sivakumaran is also interesting to everyone.

Department of AYUSH has launched in a project collaboration with states on Mother and Child care. Tamil Nadu Government has organised and a poster is also published in the central spread as a complement from on us this excellent project. A special news coverage is also given in this issue to inspire other states for excellence.

The quiz competition for physicians and students receives high inputs and appreciation. We thank all contributors for giving immense support

With regards

Dr.R.Gnanasambandam
