

Agnus castus**Dr. Anand Prasad**

Most commonly used drugs in my practice for male infertility are Agnus castus, Zinc Met and Calc. Damiana and Sabal serrulata Mother Tinctures benefited in my patients who desired instant results. Miasmatic remedies are Tuberculinum, Medorrhinum and Syphilinum.

Premature ejaculation

A 25 year old young man came with complaints of premature ejaculation. Married when he was 22 and no issues. Seminal analysis reported as oligospermia. He had excessive sexual desire and suffered from indigestion during emissions. Selenium cured all the complaints and he became father of a male child.

Dr. Sivakumaran, BHMS, "Manitha Pattana", By-pass Road, Madurai-625010. Mobile: 9842477482.

**Dr. Sivakumaran***Selenium in Oligospermia***Dr. Smita M. Betgeri**

A couple married since 4 years consulted me. The basic problem was with the male partner, oligospermia. He had weakness of memory, fearful and oversensitive and predisposed to get recurrent chest infections and diarrhoea. Selenium 6 potency to higher potency improved and solved his problems. Now he is having a male baby 4 years old.

Sepia

Selenium, Sepia, Conium, Cannabis Sativa, Medorrhinum and Lycopodium are the common medicines used very frequently in treating the male complaints. Sepia is useful if the man has a dragging sensation in the genitals and no desire for sex. Sepia is a homoeopathic infertility remedy which is safe, effective and gives desired result in many cases.
